

GOVIND PRATAP SINGH

SOC Analyst | Splunk SIEM | Threat Detection & Incident Response | VAPT

+91-6396448562 | govindsinghpratap123@gmail.com | Bareilly, Uttar Pradesh, India | github.com/hackergovind | [linkedin/govindpratapsingh404](https://www.linkedin.com/in/govindpratapsingh404) | [medium/@hackergovind](https://medium.com/@hackergovind)

SUMMARY

Cybersecurity Analyst with strong background and hands-on Splunk SIEM experience in security event monitoring, threat detection, and incident response in Home Lab. Proficient in analyzing events from IDS/IPS, EDR solutions and system security logs. Familiar with MITRE ATT&CK, Cyber Kill Chain. NASA Hall of Fame honoured, CVE-2025-61246 author. Certified eJPT v2, CRTA and Google Cybersecurity Professional Certificate V2.

EXPERIENCE

Penetration Testing Intern (Remote)

Feb 2025 – Jun 2025

CEERAS

- Conducted black-box and grey-box pentesting on web apps and APIs, identified and validated XSS, SQL Injection, IDOR, SSRF, and auth bypass vulnerabilities supporting incident analysis and security breach identification workflows.
- Performed OWASP Top 10 & API Top 10 assessments, delivered technical reports with risk prioritization and mitigation/prevention recommendations.

KEY PROJECTS

Splunk SOC Home Lab — Blue Team Detection & Monitoring

- Deployed enterprise-simulated SOC lab: Windows AD domain controller, Kali Linux attacker, and Sysmon-instrumented endpoints, configured Splunk Universal Forwarders to ingest Windows Event Logs and endpoint telemetry into Splunk SIEM.
- Built custom Splunk dashboards and real-time alerts for Mimikatz, Pass-the-Hash, and SMB enumeration, mapped events to MITRE ATT&CK and Cyber Kill Chain.
- Monitored IDS/IPS and EDR-equivalent log sources, tuned alerts to reduce false positives and surface high-fidelity threats; remains current on security blogs, threat intelligence feeds, and evolving attack techniques.

Phishing Analyzer — ML-Based Detection System

- Built ML pipeline (scikit-learn) to classify phishing/spoofing emails and malicious URLs using Shannon entropy and domain metadata, deployed as Flask REST API with real-time bulk scanning dashboard supporting SOC phishing event workflows.

TECHNICAL SKILLS

- SIEM & Monitoring: Splunk SIEM, Log Analysis, Custom Dashboards & Alerts, Splunk Universal Forwarder, Security Event Monitoring
- Incident Response: Malware Analysis, Phishing Events, Spoofing, DoS/DDoS, SQL Injection, Ransomware, IDS/IPS.
- Threat Intelligence: MITRE ATT&CK, Cyber Kill Chain, Threat Connect (familiar), IOC Analysis.
- EDR & Security Tools: Sysmon, Windows Event Logs, Cofense Triage (familiar), Burp Suite, Nmap, Metasploit, Wireshark
- Offensive Security: Web App & API Pentesting (OWASP Top 10), SQLi, XSS, IDOR, SSRF, Auth Bypass, AD Attacks, BloodHound, CrackMapExec
- Scripting & Platforms: Python, Bash, PowerShell | Docker, Linux, Git, HackTheBox, TryHackMe,

CERTIFICATIONS

- eJPT v2 – eLearn Security Junior Penetration Tester v2 (INE Security)
- CRTA – Certified Red Team Analyst: Active Directory Attack & Defence
- ICCA – INE Certified Cloud Associate (INE Security)
- Cisco Ethical Hacker – Ethical Hacking & Security Fundamentals
- Google Cybersecurity Professional Certificate V2

ACHIEVEMENTS & RECOGNITION

- CVE-2025-61246: Independently discovered and responsibly disclosed a Critical SQL Injection (SQLi) vulnerability in an open-source e-commerce platform, leading to an official MITRE CVE assignment.
- NASA Hall of Fame: Recognized on NASA's Vulnerability Disclosure Program (VDP) Hall of Fame for identifying and responsibly reporting a sensitive information disclosure flaw in their web infrastructure.

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Invertis University, Bareilly, Uttar Pradesh, India
